

Defines estimands
(ATE, ATT, LATE)

**Potential
Outcomes**
 $Y(t)$

*consistency
+ no interference*

*What happens
when we
set $T = t$?*

*SUTVA
+ graph structure*

**Structural
Equation
Model (SEM)**

Likelihood
construction
 $Y = f_Y(T, U, \varepsilon)$

*equation
 $\leftrightarrow$ arrow*

**DAG &
Graph Surgery**
 $\mathcal{G}, \mathcal{G}_T$

Identification
via do-calculus
